

## Long-term strategy of organization development (LSOD)

### **Specification of the subject of research, which is to be conducted in LTIDD:**

Research is generally focused on applied theory of Military Art and tradition of The Czech Armed Forces. Long-term intent of department development (LTIDD ROZUM - Czech name abbreviation) is emphasis on the prediction of development of military art (Military Strategy, Operational Art, Tactics and Command and Control of troops) and new perspectives on the tradition of The Czech Armed Forces. The main subject of research is the development of Military Art in the forthcoming years and application of theoretical conclusions into the training of commanders, staffs, armies and search for other variables shaping the tradition of The Czech Armed Forces.

### **LTID ROZUM Goals**

Main goal of LTIDD is to analyze and generalize the experience of the operations of troops in modern and postmodern wars, characterize and predict changes in the theory of Military Strategy, Operational Art and Tactics, to expand findings that contribute to the formation of the traditions of The CAF.

### **Partial goals**

- To analyze and evaluate military operations and other activities important for the development of Military Art in national and international context and also to create a data set of tactical and operational characteristics of particular operations.
- To characterize and predict the future character of warfare.
- To Deep the cooperation with experts from V4 countries in field of Military science
- To utilize acquired information in the broader context for further activities research and for “preparing for the next war“.

### **Outputs:**

- Publications (monographs, chapters in collections, articles in scientific journals)
- Conferences, workshops,
- Audiovisual production, Multimedia production
- Lectures, seminars
